## How to Feed Your Turkey

May 1- Start by using a pound in the morning and a pound in the afternoon at a turkey feeding sight( Can be used in a spin feeder or a regular turkey feeder).

September 1- Increase to 2 pounds in the morning and 2 pounds in the afternoon.

November 1- Increase to 5 pounds in the morning and 5 pounds in the afternoon

Do this until March 15-  
Opening turkey season.  
Continue feeding where legal.  
Cut back to 2 pounds per day  
morning and evening.

# TURKEY EXCELERATOR

Hanging Rocks Plantation has been in operation since 1996. A portion of the 3500 acres on which it is located has been in the family for five generations. A large vein of boulder type rocks is located on the property. Over the years, with erosion, many big rocks hang over under which you can walk, thus, for many, many years, they have been known as "The Hanging Rocks". Fittingly, we took the name for our plantation. The rocks are quite a piece of nature and well worth seeing. Robert Jenkins, Jr. is the fifth generation of the Hanging Rocks and he is also the manager of the plantation. We are proud of our facility in which we offer guided quail hunts, continental pheasant shoots, guided turkey hunts, trophy deer hunting, dove club and trophy deer club. We have the capability of catering to corporate events, with as large or small as you wish. We provide the entertainment and the food for the event if needed. Check out our website and contact us, we are ready to serve you.

The first pelleted feed of its kind for wild turkeys

This product contains probiotics and aflatoxin binders that help with disease control in grown turkeys and poults.

Helps with bad grains of feed such as:

corn that has been put out for deer or corn that has been left behind from a combined.

Excelerator contains high levels of calcium which enhances egg shell density for excellent hatching.

After testing this product, it has increased weight gain of five pounds on a 2 year old birds.

Helps with increasing beard length by 1 and 1/2 inches on 2 year old birds and spur length by 5/16 inches on 2 year old birds
